ATENEO DE MANILA UNIVERSITY
SCHOOL OF SCIENCE AND ENGINEERING
DEPARTMENT OF INFORMATION SYSTEMS
AND COMPUTER SCIENCE

March 5, 2013

To whom it may concern:

Philip Truscott worked at Ateneo de Manila University in the Department of Information Systems and Computer Science from March 2007 to February 2011. He also taught in the Department of Sociology and Anthropology. Within our department, he taught a variety of courses including Management Information Systems, Communications Technology, Multimedia, and Technical Writing. He received very good student evaluations. Philip was noted for his energy and sense of humor.

In addition to his required teaching load he also taught students on a voluntary basis through an organization that tries to encourage low income students to enter college. This group is called Pathways to Higher Education."

During typhoon Ondoy, many of our staff and faculty members were hard hit by the flooding. Philip took the initiative to help check up on our community members. He drove over to one faculty member to offer supplies. He also visited the neighbourhood of our departmental secretary and joined with students in a long chain gang that help to scoop mud out of the houses.

It was a pleasure to have known Philip. He was an asset to our department and our community.

Sincerely,

Ma. Mercedes T. Rodrigo, Ph.D.
Professor
